## SUMMARY

Seeking remote data visualization work opportunities , where I can have positive impact on peoples lives. Currently I am specializing in web based, advanced data visualizations and tools development, utilizing d3.js and webgl

## WORK EXPERIENCE

### Working Remotely

Aug 2016 — Present (3 years)

Dataviz engineer - D3.js, React, Angular

Based on past projects feedbacks, creative visualizations, on which I worked on, made products to have higher impacts and more engagements, simplified exploration process , helped several startups to raise more money , and overall made the products more interesting to use

**Vertical Discovery Corp.** - Created angular v7 based dashboard elements, tree chart

**TeamAps** - Built highly customizable tree chart with support of runtime changes

**Leadership Connect** - Implemented tree chart with custom layout

**Dtone** - Prototyped realtime transaction visualization using firing map,

**Datastax** - Created and maintained class diagram, graphql source model visualization

**Beyond the hedge** - Created several d3.js visualizations for south wales government

**DIWO** - Several d3.js visualization and some angularJS work

**Geowords** - Built WW2 historical viz website, which was visited by more than 100 000 people

**Ceros** - Designed names database visualization

**Trinsic** - Realty property demand visualizations

**The API Practice** - Mind Map

**DSIO** - Dashboards

**Stone ridge technology** - Spline editor and timeline chart with virtual scroll

**ADGS** - Designed visualizations for ML output data , timeline, map, network graphs

**RootsFinder** - D3-force graph and sankey modifications, chromosome diagram

**Vertical Nerve** - User flow graph visualization

**Clonskeagh** - Sankey network diagram

**Cybersprint** - Interactive DDOS attack simulation map and network diagram

**Finbrook** - Interactive charts for website

**OutlinX** - Organization chart

### Bank Of Georgia

Jul 2014 — Sep 2018 (4 years)

Full Stack .Net Developer - C#, Asp.Net, Angular

**RS** - Maintained and added new features to the employee ranking system, used oracle and asp.net

**JAVARUNNER** - Utility Desktop Application, which helped to correctly run core banking systems

**TEAMCITY** - Deployed TeamCity , continuous integration platform for internal projects.

**HRMS** - Development and maintenance of HR platform ( reporting and hiring module)

**HRMS 360** - Took part in creating 360 platform, extremely popular between upper level managements

**CES** - Realty properties evaluation system, we used angular.js and Asp.net MVC tech stack.

## PROUD OF

Member of data visualization society and community  
Winner of dataviz hackathon "Back to the future - 2018"  
Consistently (3 years in a row) "Top rated" freelancer on Upwork

## EDUCATION

Master: Software engineering (Iliauni) 2015 — 2017  
Achievements - 100% scholarship grant

Bachelor: Econometrics direction (TSU) 2011 — 2015  
Achievements - 3.9 GPA, 100% scholarship grant , three times stipend winner

## TECHNICAL SKILLS

**Strong** - d3.js, mapbox, deck.gl , vanilla javascript  
Medium - three.js, webgl, angular, react, asp.net

## LANGUAGES

English - fluent, Georgian - native
